## Student Enrollment Lifecycle Flowchart

### END-TO-END SYSTEM PROCESS FLOW

#### STEP 1: Online Pre-Registration (Remote Portal)

|                |                                                                                                                                                             |
|----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Action:        | Student visits the GNCP website, fills out the 6-step registration wizard (Program, Profile, Academic History, Health survey, Tuition choice), and submits. |
| System Output: | Generates reference number (NCST-2026-XXXXXX) and 6-digit tracking PIN. Seeds a 7-step roadmap.                                                             |
| Database:      | Saves details in pre_enrollments table with status PRE_REGISTERED.                                                                                          |

#### STEP 2: Registrar Desk (Station 1 — Room 1109)

|               |                                                                                                      |
|---------------|------------------------------------------------------------------------------------------------------|
| Action:       | Registrar verifies original hardcopy documents (PSA, Report Card, Good Moral Certificate).           |
| Kiosk Update: | Marks documents verified and changes status. Clears student to proceed.                              |
| Database:     | Updates JSON column requirements_data. Sets roadmap node registrar_verification status to COMPLETED. |

#### STEP 3: Advising Desk (Station 2 — TLC Helpdesk / Room 1107)

|               |                                                                                                      |
|---------------|------------------------------------------------------------------------------------------------------|
| Action:       | Advisor reviews course selections, details workload units, and confirms NSTP choice (CWTS/ROTC/LTS). |
| Kiosk Update: | Locks in subjects/loads and advisor notes. Clears student for clinic checkup.                        |
| Database:     | Updates JSON column helpdesk_data. Sets roadmap node advising_assessment status to COMPLETED.        |

#### STEP 4: School Clinic (Station 3 — Room 1105)

|               |                                                                                                  |
|---------------|--------------------------------------------------------------------------------------------------|
| Action:       | Medical officer performs physical evaluation and pre-screening survey review.                    |
| Kiosk Update: | Records medical fitness clearance status (Fit/Unfit). Clears student for scholarship validation. |
| Database:     | Updates JSON column medical_data. Sets roadmap node clinic_checkup status to COMPLETED.          |

## Student Enrollment Lifecycle Flowchart

### STEP 5: Scholarship Desk (Station 4 — Scholarship Office)

|                      |                                                                                                                    |
|----------------------|--------------------------------------------------------------------------------------------------------------------|
| <b>Action:</b>       | Scholarship officer reviews grant vouchers (Academic, Sports, Merit, etc.).                                        |
| <b>Kiosk Update:</b> | Applies corresponding tuition discount rates (e.g. 100% tuition free, 20% discount). Updates balance in real-time. |
| <b>Database:</b>     | Updates JSON column scholarship_data. Sets roadmap node scholarship_verification status to <b>COMPLETED</b> .      |

### STEP 6: Treasury / Cashier (Station 5 — Room 1111)

|                      |                                                                                                  |
|----------------------|--------------------------------------------------------------------------------------------------|
| <b>Action:</b>       | Cashier calculates total billing ledger balance and collects downpayment or full tuition.        |
| <b>Kiosk Update:</b> | Records payment mode, amount paid, transaction reference, and marks account paid.                |
| <b>Database:</b>     | Updates JSON column payment_data. Sets roadmap node cashier_payment status to <b>COMPLETED</b> . |

### STEP 7: IT Center (Station 6 — IT Desk)

|                      |                                                                                                                          |
|----------------------|--------------------------------------------------------------------------------------------------------------------------|
| <b>Action:</b>       | IT officer takes webcam snapshot for ID card, creates institutional portal account, and generates temporary credentials. |
| <b>Kiosk Update:</b> | Generates permanent ID number (e.g. 2026-XXXX) and triggers final activation.                                            |
| <b>Database:</b>     | Updates JSON column enrollment_data. Sets roadmap node id_email_final status to <b>COMPLETED</b> .                       |

### SYSTEM DATA MIGRATION & ACTIVATION (Automatic Transaction)

|                          |                                                                                                                                                                                                                                                                                   |
|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Trigger:</b>          | IT Desk clicks <b>Finalize &amp; Activate Account</b> with all 7 roadmap steps completed.                                                                                                                                                                                         |
| <b>Database Actions:</b> | <ol style="list-style-type: none"><li>1. Updates status in pre_enrollments staging to <b>ENROLLED</b>.</li><li>2. Inserts verified profile data into production students directory.</li><li>3. Enrolls student in classes by inserting a record into enrollments table.</li></ol> |
